

FORT BUCHANAN Recycling What You Can Do

*Sustaining
the Environment*

The Environmental Division would like to thank all military, civilian and students who have helped protect the Environment by recycling. But, there is much more to do... and we depend on your support!!

Fort Buchanan is subject to various regulations requiring Recycling: 1) Executive Order (EO) 13514; 2) EO 13423; 3) Army Regulation 200-1 Chapter 10-2 the Fort Buchanan Pollution Prevention Management Plan and the Fort Buchanan Solid Waste Management Plan. In accordance with the Environmental Management Action Plan (EMAP) #2; the objective is to reduce 50% of the generated solid waste by FY 2015. The goal is to reduce Hazardous Waste to implement Green Procurement in order to minimize waste generation. Fort Buchanan, including its tenants, shall exercise leadership initiatives in the reduction of Solid Waste that are typically incinerated or land filled; and prevent waste generation of materials through source reduction, reusing and recycling.

WHY RECYCLE ?

Recycling saves energy, conserves natural resources, extends the useful life of landfills and decreases pollution.

Items "ONLY" Recycled at marked Recycling Dumpsters

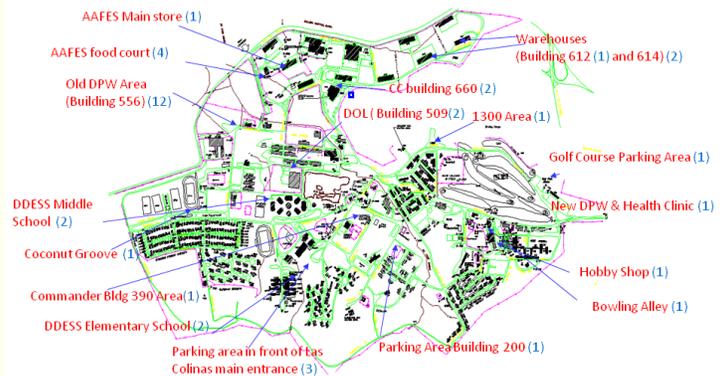

Fort Buchanan has a total of 19 Recycling Points distributed throughout the Post

Office Recycling Program

Fort Buchanan's janitorial cleaning services contractor will pick up all the recycling materials accumulated in offices they service. Nevertheless, these materials must be properly placed and accumulated in the designated, marked or labeled recycling containers. Color coded plastic bags identify regular waste (grey-black bags) from recyclables (white-transparent bags). Recycling containers (pictured), may be obtained from the DPW Environmental Division (limited quantities available).

Fort Buchanan Recycling Drop-Off Locations
